

HYDRATING

Facial serum

Light gel texture with a high content of hyaluronic acid, diamond powder and natural rose water for long-lasting skin hydration.

Diamond powder - deeply hydrates and improves skin comfort, by brightening and refreshing it.

Hyaluronic acid – a natural skin component, it has an extraordinary ability to retain water nearly a thousand times more than its own weight. What is used in REFAN's products is the branched-chain hyaluronic acid (cross-linked hyaluronic acid), which due to its structure has a high water-absorbing capacity, similar to high-molecular hyaluronic acid, but much more stable to enzymatic degradation and with easier penetration into the skin. Branched-chain hyaluronic acid is well known as a skin filler. Dermatologists inject it directly into the skin to physically fill in wrinkles from within. Many consumers do not like this invasive and expensive approach and therefore look for cosmetic products that imitate the properties of dermal fillers. REFAN uses exactly this type of hyaluronic acid.

Natural rose water - has a soothing and anti-inflammatory effect. It tones and refreshes facial skin, improves blood circulation and maintains water balance.

Use: Apply with gentle patting movements, as a base before the day or night cream, on cleansed and dry face skin.
