

Organic Waters

Organic rose water ROSA DAMASCENA

The water is distilled from fresh blossoms of roses, grown in ecologically-clean area near the village of Tarnichene, region of Kazanlak. The rose plantations and soils are not treated with pesticides, artificial fertilizers or other synthetic preparations.

The water from the blossoms of Rosa damascena has a soothing and anti-inflammatory effect on rash and skin irritation. It cleanses, softens, moisturizes and scents the skin.

Use: apply lavender water directly on to skin with a cotton pad or cloth.
